

27th March, 2026

Dear Director General,

The National College of Computer Science in Piatra-Neamț (Colegiul Național de Informatică), together with its INFOMAT Foundation, represented by Mrs. Daniela Neamțu, PhD, is delighted to extend an invitation for your organization to join us as a valued partner in organizing the 9th edition of the International Informatics Olympiad in Teams (IIOT).

Since its first edition in 2017, which brought together teams from three countries in Bologna, Italy, the IIOT has grown into a vibrant international event, welcoming 16 participating nations in 2026. This growth reflects our shared commitment to fostering global collaboration, digital competence, and academic excellence, highlighting the collective effort that drives educational innovation in computer science.

What makes the IIOT truly distinctive is its focus on teamwork at every level. Each student team of four demonstrates how collaboration, mutual support, and shared problem-solving lead to success. Similarly, professors from different countries work closely together to design competition problems, ensuring fairness, rigor, and the highest standards. By combining online and on-site stages, with English as the official language and simultaneous problems across multiple countries, the Olympiad embodies the spirit of cooperation, inclusivity, and shared achievement.

The international final, taking place in Romania from May 23–28, 2026, will bring together the top two teams from each national final alongside the Leader School teams from each country. Participating nations include Romania, Italy, Hungary, Bulgaria, the United States of America, Sweden, Iran, Israel, Egypt, the Republic of Moldova, Georgia, Slovakia, Slovenia, Saudi Arabia, Vietnam, and Syria.

Through initiatives such as IIOT, the National College of Computer Science aims to cultivate not only digital skills and high achievement but also a sense of international camaraderie, ethical competition, and lifelong collaboration. By partnering with your organization, we hope to strengthen these shared values and create a lasting, meaningful impact across the global educational landscape.

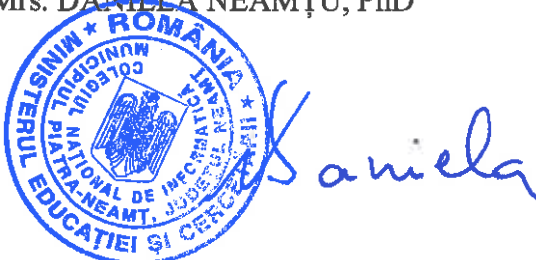

We would be honored to count on your support and to associate your organization with an initiative that celebrates teamwork, innovation, and the development of future technology leaders. Your contribution will be recognized across all event communications, printed materials, college publications, and media coverage, highlighting your commitment to nurturing collaboration and excellence.

We look forward to the possibility of working together to make the 9th edition of the IIOT a remarkable and unifying experience for students, educators, and partners alike.

Yours faithfully,

On behalf of the National College of Computer Science and the INFOMAT Foundation,

Mrs. DANIELA NEAMȚU, PhD

Daniela
